TITLE : DEVICE FOR WRITING AND PRINTING
OF RECORDING MEDIUM

ABSTRACT : PROBLEM TO BE SOLVED: To continuously subject a recording medium disk to writing and label printing with a simple device.

SOLUTION: One sheet of the recording media is clamped by a recording medium clamping section 9 from a supplying section 3 for supplying the unwritten recording media. The recording medium is transferred to a data wiring tray 13 by a vertical transporting device 11 and horizontal transporting device 12. The data is written to the recording medium by a data writing device 2. The recording medium failed in the data writing is recovered into a defective article recovering section 5. The recording medium written with the data is transferred to a printing tray 6 and is subjected to label printing by a printer 8. The recording medium with which the data writing and the label printing are completed is transferred to a non-defective article recovering section 4 and is recovered.
